

Name of scientist: _____

Bread Mold Lab Report Conference Sheet

* Double check to be sure you have all of the following components included in your lab report. Then have a partner read your lab report to offer you any advice on how to improve the style, content, and grammar of each area.

Question: _____

Hypothesis:

1. clearly stated
2. reasoning given

Materials:

1. used to set up experiment
2. used during observations

Procedure:

1. during set up
2. during observations

Observations:

1. all 14 days
2. each one has specific details and description
3. each one is dated

Conclusion

1. statement about hypothesis
2. explanation of results (includes data)
3. further questions raised

Is everything you've written a "complete sentence" (no run-ons or fragments)?

Have you double-checked your spelling?

Have you said everything you need to say in a clear manner?

Is your final copy neat?

Did you do your best work?
